

Arshdeep Singh
Toronto, CA | 437-660-4981 | Arsh99.in@gmail.com

Career Summary

- Experienced Software Developer with around 2 years of dedicated experience in building web applications, ensuring the delivery of high-quality software solutions.
- Demonstrated exceptional customer service skills by efficiently managing inquiries and guest services for over 2200 residents and visitors in the vibrant downtown Toronto area.

EXPERIENCE

Concierge – One York Quay Condominium – Toronto, Canada February 2024 – Present

- Providing top-notch assistance to 2200+ residents and visitors in downtown Toronto, efficiently managing inquiries, parcels, parking passes, and guest services.
- Overseeing key systems and maintenance across 800 suites, ensuring optimal building operations and resident comfort, and implementing crowd control measures for fire route clearance.
- Demonstrating clear communication with residents, visitors, and staff to foster positive relationships and uphold professionalism.

Software Developer – Tekonika Technologies – Chandigarh, India March 2022 – February 2023

- Led the development of Rakuten's Symphony project, leveraging React.js, Material UI, and various libraries to optimize performance and debug complex issues.
- Implemented custom hooks to create reusable and performant components, resulting in streamlined development processes and enhanced user experience.
- Collaborated closely with Testing Teams, Scrum Masters, and Business Analysts, ensuring seamless project execution and alignment with client requirements.

Web Applications Developer – Diro – Delhi, India September – December 2021

- Transformed a complex Angular application into React within a strict three-month deadline for a FinTech project, achieving a 27.27% performance improvement.
- Utilized React.js and Bootstrap to enhance component reusability and streamline user interface development.
- Proactively contributed innovative ideas and solutions, fostering a collaborative work environment, and driving project success.
